OBJECTIVE

Highly motivated B.Tech Computer Science student with strong foundations in Full-Stack Development, Machine Learning, and Artificial Intelligence. Experienced in building scalable MERN applications and end-to-end ML pipelines from preprocessing to deployment. Passionate about solving real-world problems through modern software engineering and AI-driven solutions.

PROJECTS

Clash of Codes – Real-Time Competitive Coding Platform (MERN + Socket.IO)

- Developed a full-stack competitive coding platform using MongoDB, Express.js, React.js, and Node.js.
- Implemented real-time multiplayer lobbies, contest synchronization, and live leaderboard updates using Socket.IO.
- Built secure JWT authentication with Google OAuth integration and role-based access control.
- Developed an online code execution and automated evaluation engine supporting multiple programming languages.
- Designed RESTful APIs for authentication, contests, submissions, user profiles, and leaderboards.
- Integrated MongoDB with Mongoose for efficient storage of users, contests, submissions, and rankings.
- Built responsive dashboards for contests, profiles, submissions, and performance tracking.
- Optimized backend performance through modular architecture and reusable Express middleware.

Stock Price Prediction using LSTM (TensorFlow + Django Deployment)

- Built an LSTM-based stock price prediction model using TensorFlow and Keras.
- Performed preprocessing, normalization, feature scaling, train-test splitting, and feature engineering.
- Evaluated model performance using RMSE and loss metrics.
- Integrated the trained model into a Django web application for real-time prediction.
- Implemented authentication, CRUD operations, SQL database management, and model deployment.
- Applied the complete ML lifecycle from data collection to deployment.

IMDB Movie Review Sentiment Analysis (NLP Project)

- Developed an NLP sentiment classifier using TF-IDF and Scikit-learn.
- Applied tokenization, stopword removal, stemming, and TF-IDF vectorization.
- Performed exploratory data analysis using Pandas, Matplotlib, and Seaborn.
- Evaluated classification performance using standard NLP metrics.

SKILLS

Languages: Python, C, C++, Java, SQL

Machine Learning & AI: TensorFlow, Keras, Scikit-learn, Pandas, NumPy, Deep Learning, EDA

Web & Deployment: React.js, Node.js, Express.js, Django, MERN Stack, Socket.IO, REST APIs, JWT, OAuth

Databases & Tools: MongoDB, Mongoose, SQL, Git, GitHub, Postman

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Languages Spoken: English, Tamil, Hindi

EDUCATION

B.Tech Computer Science and Engineering
VIT Chennai
CGPA: 8.93

2024 – 2028
Chennai

Class XII – Computer Science
Velammal Vidhyashram Mambakkam
Percentage: 95.4%

2023 – 2024
Chennai

Class X – Mathematics and Computer Science
Velammal Vidhyashram Mambakkam
Percentage: 96.4%

2021 – 2022
Chennai
